About

I'm a Marketing Artist based in Istanbul and a Graphic Design graduate of Istanbul Okan University. I started as a freelance designer across different industries, then moved into NFT gaming as a community manager and artist.

I later joined 7apps in mobile apps, first as a Marketing Artist and then as a Jr. Marketing Specialist, and helped take Banger: AI Cover Songs & Music to #5 in the US App Store Music category. At Voyager I spent two years making performance-driven ad creatives for mobile games across genres. Most recently at PlayableX I focused on AI-powered video and creative concepts for different game types. I like combining design, marketing, and AI into work that performs.

Experience

● **PlayableX** May 2026 – Sep 2026

Marketing Artist · Full-time

I produced UA creatives for mobile games, centered on AI-powered video. I also shaped the ideas behind them, building concepts that fit different game types. I then turned those ideas into finished videos that could go straight into campaigns.

● **Voyager** Aug 2024 – Apr 2026

Marketing Artist · Full-time

I made performance-driven ad creatives for mobile games across genres. The work covered both gaming and non-gaming apps, from the first idea to the finished ads. I adapted each creative to the product, so a game and a non-gaming app never got the same approach.

● **7apps** Jan 2023 – Mar 2024

Jr. Marketing Specialist · Sep 2023 – Mar 2024

Jr. Marketing Artist · Jan 2023 – Mar 2024

Full-time · Hybrid · Istanbul

I created marketing creatives for mobile apps, first as a Jr. Marketing Artist and then as a Jr. Marketing Specialist. I helped take Banger: AI Cover Songs & Music to #5 in the US App Store Music category. The role mixed hands-on design with the marketing of a live app.

● **Hungri Games** Mar 2022 – Sep 2022

NFT Gaming Community and
Social Media Manager

Full-time · Istanbul

I managed the community and social channels for an NFT gaming studio. The focus was growing digital awareness and keeping the games visible to players online. Regular posts and community updates kept the studio present between releases.
